WORK EXPERIENCE

Network Security Engineer(SecOps)

Tata Consultancy Services (TCS)

10/2020 - Present

Mumbai, INDIA

Works as an Security Engineer Role in Cyber Security Domain.

- As a part of SecOps team, we make sure that the End Points in our Networks are secure from attackers and also make sure that client meets their daily operations requirement BAU.
- Our basic task is to make our organization secure from various malicious or phishing activities through Zscaler Security Agent.
- We works on Cloud security technology like Zscaler Tool, Bluecoat Tool, CrowdStrike, On-premises Proxys and firewalls, IAM tool, Pac script configuration, Cyberark.
- Our basic task is to restrict all the malicious domain in our Network and provide access to Clients based on their requirement and approval from Client End and ISM.
- Also we need to collect VPN/VDI/RDP/citrix requirement from the Client team and bypass the client Network in TCS Network so that client get access to their own Network.

PERSONAL PROJECTS

Virtual Personal Assistant - SaRa AI (01/2020 - 06/2020)

- Created a Personal Assistant program in Python as a major BCA Project.
- The Code takes input from User as a string and match the statements with If-else condition and then execute the function.
- Uses Python module such as pyttsx3,datetime,speech_recognition, os, random, etc.
